SPEECH PATHOLOGY CEUs
The MBSImP™ And Dysphagia Practice: Targeted Intervention Through Standardized Physiologic Swallow Assessment

JACKSONVILLE, FL
February 9-10, 2013

SEMINAR DESCRIPTION
This seminar addresses the adult population and is designed for clinicians who conduct MBS exams, treat patients following an MBS exam, or both, in any setting along the healthcare continuum. The format includes an evidence, case-based approach to learning the implementation and interpretation of a standardized modified barium swallow examination using the MBSImP. Participants will learn to execute a standardized and efficient examination that permits flexibility for safe and immediate introduction of interventions based on the nature of impaired components. Implications of the MBSImP approach on radiation safety will be presented. Performing and treating clinicians will learn to link unimplicated physiologic components to potential levels of disruption in sensor-motor control across patient diagnoses.

Participants will learn to detect mild to profound deviations in normal function across various ages based on new evidence using the MBSImP component scoring system. The potential application for neurorehabilitative and neuromodulation exercises will be presented. The functional relationship between swallowing abnormalities and unimplicated swallowing disorders will be discussed. The application of targeted interventions and treatment planning based on specific impairments of swallowing will be covered. Participants will receive sample reports and learn to create electronic, web-based patient reports based on MBSImP findings.

Outcome tracking within a single healthcare facility or healthcare system that supports the value of the MBS study and swallowing treatment will be described. The MBSImP approach on radiation safety will be presented. Performing and treating clinicians will learn to link unimplicated physiologic components to potential levels of disruption in sensor-motor control across patient diagnoses.

SEMINAR LOCATION
JACKSONVILLE, FL
February 9-10, 2013
St.Vincent's Medical Center
Riverbend Medical Park
800 Riverbend Pkwy.
Jacksonville, FL 32207
Phone: 904-396-7700
Fax: 904-396-7770

SEMINAR OBJECTIVES
At seminar conclusion, participants will be able to:

- Conduct and advocate for standardized, valid and reliable approaches to MBS assessment that maximize clinical yield and minimize radiation exposure.
- Identify 17 physiologic components of swallowing function and detail levels of impairment.
- Differentiate normal function from impairment across the aging continuum.
- Interpret MBSImP reports from referring clinicians and execute a targeted, evidence-based treatment.
- Develop standardized patient reports including goal setting and outcome tracking.
- Develop clinical competency measures for conducting swallowing assessments using the MBSImP approach.
- Create profiles of swallowing impairment across the natural history of a condition or course of recovery.

SEMINAR OUTLINE

DAY ONE
3:30-7:30
Check-In and Orientation (Coffee and Tea)
7:30-8:00
Session One (break from 9:30 to 9:45)
- Neurophysiologic and neuroanatomic correlates of pharyngeal swallowing
- Review and radiographic identification of 17 physiologic components of swallowing
- Clinical symptom correlates of pharyngeal swallowing impairment and aspiration
- Preparation of airway and neuroanatomic control mechanisms

12:00-1:00
Lunch on Own
1:00-4:00
Session Two (break from 2:30 to 2:45)
- Review of commonly occurring types of swallowing impairments
- Interdisciplinary level of severity of clinical implications
- What’s normal “impairment” across the aging continuum?
- SLP’s role in assessment of swallowing function: Implications of pharyngeal impairment on swallowing disorders and repercussions for treatment
- Identification of multilevel functional dysphagia and implications for neuroprotective and neurorehabilitative exercise
- Targeted, evidence-based intervention for swallowing-specific impairments
- Adjourn and Sign Out

DAY TWO
5:30-7:30
Sign-In (Coffee and Tea)
7:30-8:00
Session Three (break from 9:30 to 9:45)
- Standardized reporting of results, impairment profiles and outcome indicators (health, quality of life, oral intake and nutritional status): using the MBSImP approach
- Mapping swallowing profiles across the natural history of disease and recovery
- SLP to Clinical Researcher: opportunity for multi-site clinical investigations and advancement of dysphagia research
- Patients: Stroke: acute neurologic (CVA, trauma); pulmonary disease (alternative/reconstructive head & neck cancer: chronic and progressive neurologic disease; Initial assessment: classification and scoring
- Targeted, evidence-based treatments
- Objective documentation: treatment response and patient outcomes
- Adjourn, Sign Out, and Certificates
